

Press Release

Frederic Onado to participate to Connections Europe

Frederic Onado, SPiDCOM Technologies COO and Vice President EMEA of the HomePlug Powerline Alliance, will be a panelist during the Connections Europe Conference that will take place in Nice on March 31st. He will participate in the 14:15 session entitled "How Consumer Electronics Get Connected".

Paris, France, March 16th, 2009 – SPiDCOM Technologies today announced that its COO, Frederic Onado, will be a panelist during the next Connections Europe Conference. He will represent the HomePlug Powerline Alliance in the session entitled "How Consumer Electronics Get Connected".

Consumer electronics manufacturers have many choices in designing network-connected products. This panel will bring together companies developing connectivity solutions for fixed and mobile platforms to discuss such areas as home networking, device discovery software, media server solutions, conditional access and digital rights management, and the role of service providers in developing network-connected devices.

Frederic Onado will explain why HomePlug AV is the easiest, most effective and cost competitive backbone to connect all the home multimedia devices together.

For more information on the conference, you can browse Parks Associates website:
